

# International Political Economy Series

## Series Editor

Timothy M. Shaw , Emeritus Professor, University of Massachusetts  
Boston, Boston, MA, USA;  
University of London, London, UK

The global political economy is in flux as a series of cumulative crises impacts its organization and governance. The IPE series has tracked its development in both analysis and structure over the last three decades. It has always had a concentration on the global South. Now the South increasingly challenges the North as the centre of development, also reflected in a growing number of submissions and publications on indebted Eurozone economies in Southern Europe. An indispensable resource for scholars and researchers, the series examines a variety of capitalisms and connections by focusing on emerging economies, companies and sectors, debates and policies. It informs diverse policy communities as the established trans-Atlantic North declines and ‘the rest’, especially the BRICS, rise.

*We dedicate this volume to the memory of our great friend and colleague,  
Zsuzsánna Biedermann, an outstanding scholar of African political  
economy.*

## ACKNOWLEDGEMENTS

We would like to express our gratitude to Timothy Shaw, the editor of the IPE series. Tim has been an endless source of inspiration, advice, and support throughout the process. We are also grateful to Anca Pusca, Uma Vinesh, and the rest of the Palgrave and Springer teams.

The initial idea of this book comes from the series of international conferences entitled, “The Role of State in Varieties of Capitalism” (SVOC), organized by the Institute of World Economy (IWE) at the Centre for Economic and Regional Studies in Budapest, Hungary. The original idea of the research programme related to varieties of direct state economic involvement, as well as the foundation of the annual conferences on this topic, goes back to Miklós Szanyi (former Director of IWE). Magdolna Sass, the current Director of IWE has also joined our initiative and actively participated in the professional and organizational work related to recent SVOC conferences. We would like to thank both of them, for their professional support and enthusiasm accompanying our work throughout the years.

This volume is an outcome of original research conducted in the framework of the research project ‘From developmental states to new protectionism: changing repertoire of state interventions to promote development in an unfolding new world order’ (FK 124573) supported by the National Research, Development and Innovation Office (NRDIO) of Hungary between 1 December 2017 and 30 August 2023.

# CONTENTS

<b>1</b>	<b>Introduction: Emerging Market Economies and Alternative Development Paths</b>	<b>1</b>
	Judit Ricz
